

TR7 PRO

Steam cleaning possesses a number of benefits over more traditional cleaning methods. Cost, hygiene and environmental factors are amongst some of the benefits associated with steam cleaning. Using dry-steam at a temperature in excess of 120°C will completely sanitise surfaces, destroying microorganisms such as bacteria, mites, and mildew. The Edge TR7 Pro steam & vacuum machine will do just this, with an operating temperature of 160°C which is well above the sanitised. In addition to the steam facility, the TR7 Pro has a vacuum that will immediately suck up all residue grease, grime and bacteria. The exclusive “VAP FILTER”, a pipe sprayed with 160°C of continuous steam catches even the smallest particles of pollen, mites and micro-dust, often responsible for serious respiratory ailments, and perfectly purifies the exhausted air. The TR7 Pro uses very little water and no harsh chemicals, so we can say without exception that the TR7 Pro is an extremely environmentally friendly machine.

Product features;

- Stainless Steel Boiler
- Multi-powered Wet/Dry Vacuum
- 2“Vapm
- Automatic Safety Check System
- Safety Valve
- Continuous Water Fill
- Ergonomically Designed
- Power @ Handle 6 Volt
- Air Purification
- HACCP Compliance

Application;

Bathroom / Shower / Kitchen
 Owens / Windows / Floors
 Doors / Carpets / Sofas

Standard equipment

	TR7 Pro
CODE	2072
OPERATING PRESSURE/MAX	6bar
TOTAL MAX POWER	2400W
MAX BOILER POWER	2400W
MAX VACUUM POWER	1200W
IRON MAX POWER	800W
ELECTRIC POWER SUPPLY	220 – 240 V – 50/60 Hz
BOILER CAPACITY	1.5 l
REFILL TANK	1.5 l
VACUUM BUCKET	1.5 l
MACHINE DIMENSIONS (cm)	480x350x320
MACHINE WEIGHT	11Kg
